Mr. Frank Werts, President
SMK Enterprises, Inc.
PO Box 8
Leola, Pennsylvania 17540

Dear Mr. Werts:

It is with great pleasure that I offer a recommendation for you and SMK Enterprises predicated on the work performed supplying approximately two thousand (2000) metal radiator covers for installation in the District of Columbia Public Schools from January 2009 to present.

SMK's professionalism was evidenced from your initial response to a vague descriptive specification to provide radiator covers for the District of Columbia's elementary and middle schools by authoring a design in keeping with the character and varying aesthetic requirements of thirty six (36) different schools built over the last one hundred (100) years.

Fabricating covers to accommodate the piping of both hot water and steam heating presented another challenge which SMK met by meticulous measuring and documenting of existing conditions too numerous to measure.

The design, fabrication, delivery and installation of the covers (where necessary) were accomplished on time, within budget and within all other contractual requirements.

Predicated upon the District of Columbia systems experience with SMK, we have no hesitation either hiring you again or recommending you and your firm to anyone considering the fabrication and installation of radiator covers.

Sincerely,
Anthony Michael Butler
Program Manager
